**LAB MANUAL 2**

Creating class with ABAP

Step 1: Right Click on the Package you create in Lab 1 → Click on "New" →
Click on "ABAP Class"

Step 2: Follow the following rules to create the classes in the ABAP.
- *Just because we are using the package named as "ZTRAVEL_APP_1999", we need to start our class name with "ZTRAVAL_XXXXXXXXX"*
- *In place of "XXXXXXXXX" you can use your definition but keep it relative.*
- *You can check you package name also.*

Step 3: Click on "Finish"

Click on "Finish"

Note: your class is now created.

As you can see Your class is created now, "ZTRAVAL_LAB2_DEMO_CLASS"
