LAB MANUAL 1
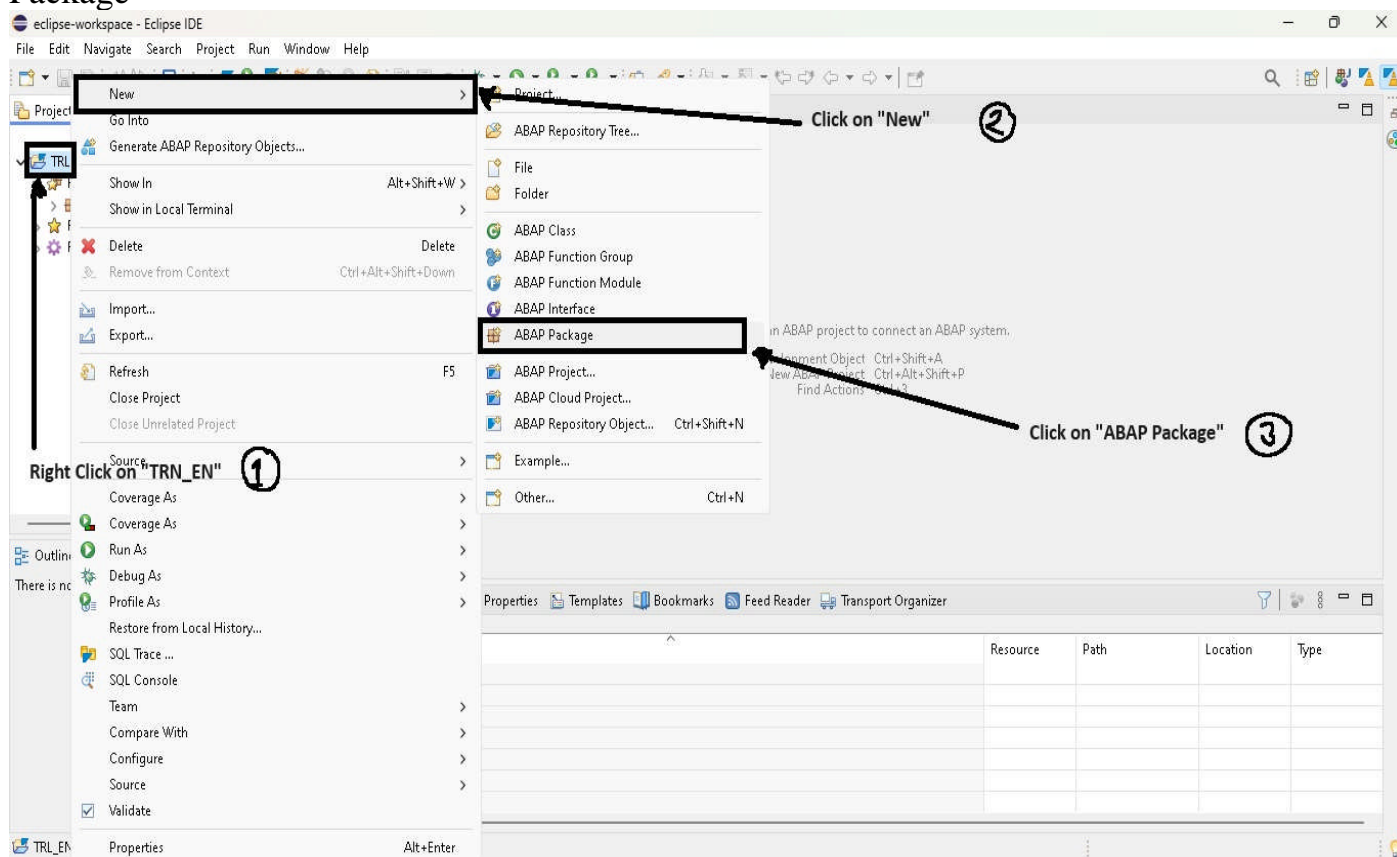

Creating ABAP Package

Step 1: Right click on "TRL_EN" → Click on "New" → Click on "ABAP Package"

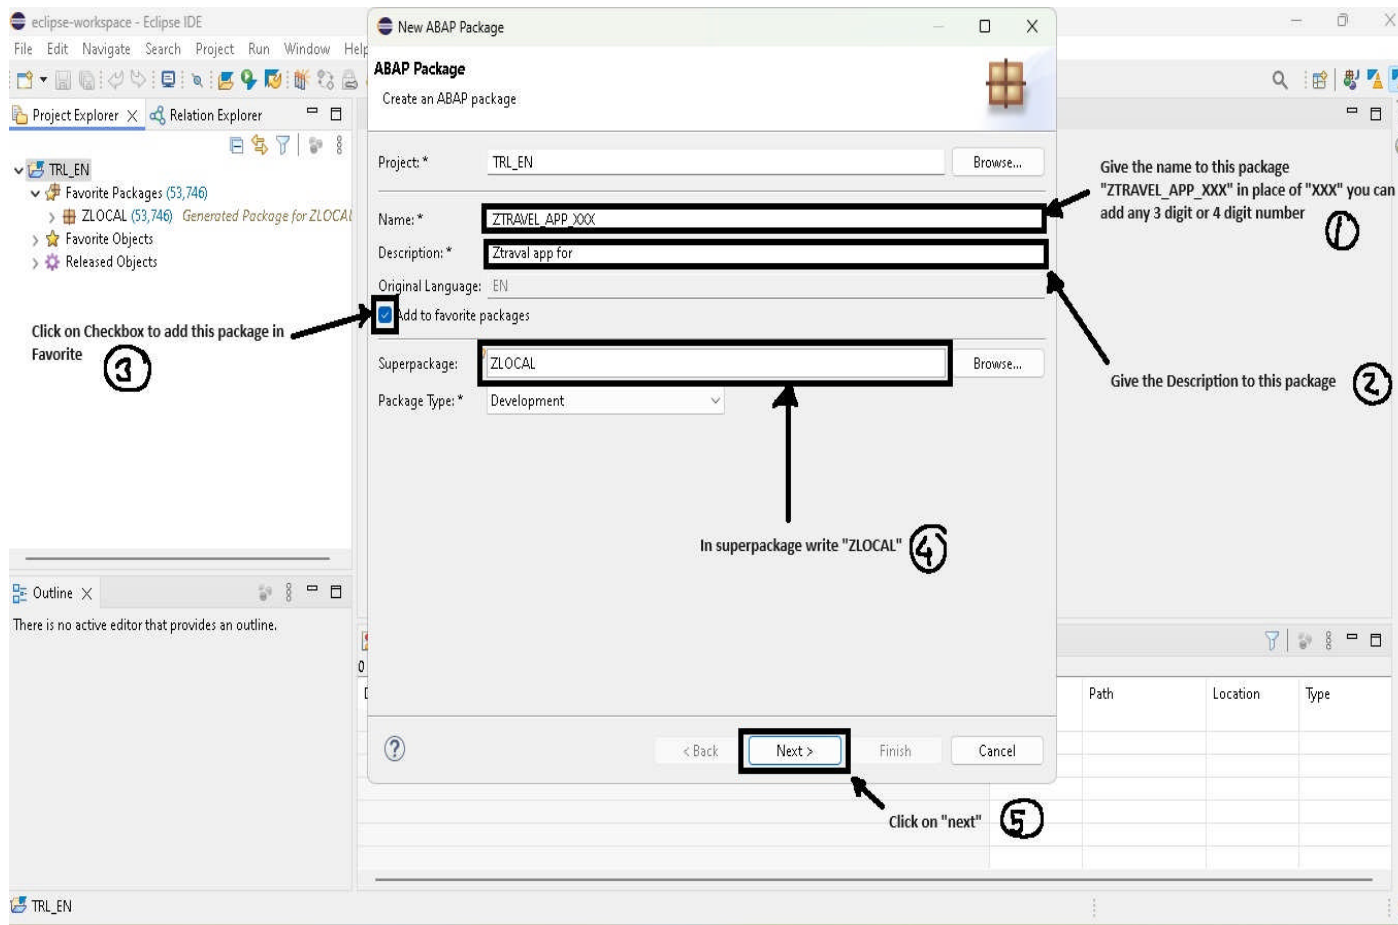

Step 2: follow the following instructions to create the pckage.
- Name: ZTRAVEL_APP_XXX
- Description: Package for travel XXX
- Superpackage: ZLOCAL
- Check Add to favorite packages

Note:
- *In place of "XXX" in name of package you need to use any 3 or 4 digit number, Keep this name in your mind because it is going to use in next steps.*
- *Keep the default Superpackage as ZLOCAL only*
- *In this lab I am using ZTRAVEL_APP_1999 as name of the package.*

Step 3: There is two scenarios.
- You get your package name in the table so directly click on "Finish", because it's by default selected.
- Or you get following scree, and then add your package name that you used in step 2. In my case its "ZTRAVEL_APP_1999" and click on finish.

Note: Package is created:
